

CAPRICE High Efficiency Industrial Oil-Fired Hot Water Boiler

CAPRICE INDUSTRIAL SERIES

- Wet Leg, High efficiency boiler design
- Designed to A.S.M.E. requirements
- CRN registered
- Low water mass and thick insulation reduce stand-by losses
- Available with high capacity coil heat exchanger for efficient generation of domestic hot water
- Compact vertical design eliminates the need for special entrances and floor reinforcement
- Adaptable boiler design covers the entire range, requiring only the change of a nozzle
- Available with the advanced Sentry 2000 Micro Processor based Controller, which provides precise and efficient boiler operations, resulting in increased comfort and reduced fuel consumption
- Certified for installation on combustible floors
- Certified and rated to strict CSA codes

For more than 25 years, the New Yorker Boiler series has been the standard of quality, reliability and efficiency. NY Thermal has continued to improve the design and functionality of the New Yorker Boiler series, to again make it the optimum of oil-fired hot water heating equipment.

When you choose NY Thermal, you choose the new standard in top quality boilers! You can trust our commitment to excellence in quality, reliability and customer service. And you can count on years of trouble-free, safe and comfortable heat. Only from NY Thermal.

MODEL	NET INPUT (GPH)	BOILER OUTPUT (BTU)	NET OUTPUT (BTU)	BOILER HORSEPOWER	STEADY STATE EFFICIENCY
C380	3.00	374,000	337,000	11	89%
C440	3.50	432,000	389,000	13	89%
C500	4.00	490,000	441,000	15	88%
C550	4.50	542,000	542,000	16	87%
C600	5.00	600,000	488,000	18	86%
C660	5.50	658,000	593,000	20	86%
C720	6.00	712,000	641,000	21	85%
C740	6.20	733,000	660,000	22	85%

BOILER SPECIFICATIONS

Boiler Shell	C380-740
Shipping Weight (lbs.)	680
Supply & Return Size	3"
Height ... H"	59"
Depth ... D"	25"
Width ... W"	25"
Stack Size ... S"	9"
Water Volume. (Imp. Gal)	44
Max. Coil Size	Two, WH-8
Tube Quantity	42
