

NEW YORKER High Efficiency Hot Water Oil-Fired Boiler

OIL-FIRED BOILER

- **Optional SENTRY 2100 controller, which provides precise and efficient boiler operations resulting in increased comfort and reduced fuel consumption**
- **Efficient dry base boiler**
- **Fitting location is standardized to aid in plumbing**
- **Combustion chamber is supported by a spacer to keep base cool and to make chamber removal and replacement easy, while preventing damage**
- **Unique design reduces jacket and stand-by losses**
- **Raised flange TANKLESS COIL**
- **High capacity Heat Exchanger Coil provides ample, inexpensive domestic hot water**
- **Computer aided design by experts**
- **Easy servicing from the front & top**
- **Compatible burners – Beckett & Riello**
- **Certified and rated to strict CSA codes**
- **Available with CRN certification (optional)**

For over 35 years, the New Yorker Boiler series has been the standard of quality, reliability and efficiency. NTI has continued to improve the design and functionality of the New Yorker Boiler series to again make it the optimum of oil-fired hot water heating equipment.

When you choose NTI, you are choosing the standard by which quality boilers are made!

You can trust our commitment to excellence in quality, reliability and customer service. And you can count on years of trouble-free, safe and comfortable heat. Only from NTI.
